NUMBERING OF PLOTS AND ROADS

1. NAMING THE BLOCKS

- i. The scheme may be divided into Blocks keeping in view its area.
- ii. Efforts shall be made to ensure that each Block is bounded in such a way that total numbers of plots in the Block do not exceed 500 or so.
- iii. Boundaries of each Block shall be well defined with a road or prominent physical feature
- iv. These Blocks shall be named or given alphabetical numbers.

2. NAMING THE ROADS

Each road shall be given a name, numerical or alphabetical number for identification

3. NUMBERING OF PLOTS

A particular plot in a street shall be given a unique/specific number. The intention is to make it easier to locate it. There are different systems being followed for numbering of plots, same are summarized below.

Option 1

Odd numbers on the left side, as viewed from the datum point at the start of the road, and even numbers on the right side. Along long roads numbers will typically ascend until the road crosses a junction or reaches the boundary of the next Block.

Option 2

To proceed sequentially along one side of the road and then back down the other, it is a combination of clockwise and anti clockwise system, depending on the layout plan.

Option 3

First roads are numbered. Then plots are numbered along both sides of the road sequentially or on odd/even system basis. In this case the road numbers vary but the plot numbers in each road start from one.

Option 4

Plots which surround a square are usually numbered consecutively clockwise.
